

A #FOAMed project for #nurses? Looking for ideas and suggestions.

Nursing isn't taking to FOAMed like the medical community is. So I was thinking. How about a CEN (Certified Emergency Nurse) prep course for nurses using #FOAMed concepts. The tools are there. We could do it cheaply in cost, but in time on the other hand, that might be a bit expensive.

Not only would nurses who complete the proem be ready to take the CEN exam, but they would also be well grounded in SOME and FOAMed.

Any thoughts, idea's
